- Dimensions (L x W x H): 12.5 x 10.0 x 13.5" (31.8 x 25.4 x 34.3cm)
- Durable (IP65) & Weather-Resistant NEMA 3R Rated Construction
- 1-Year Limited Factory Warranty
- 400Hz-7kHz Frequency Range Optimized for Human Voice
- Line Input for External Sound Source Connection/Audio Projection
- Free Downloadable App for Remote Smart Phone Operations

The **Max-Out™ Portable Acoustic Hailer** is designed to help ensure that your agency's message is heard loud and clear in virtually any life-threatening or non-emergency law enforcement application, such as:

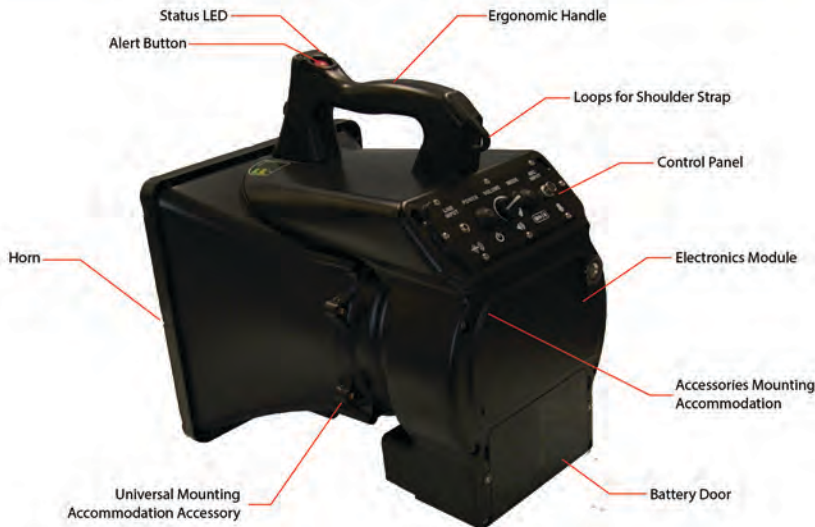

- Hostage/Barricade Response
- Disaster Notification, Evacuation & Relief
- Community Event Public Address
- High-Risk Warrant Service
- Crowd Management/Addressing Protesters
- Cell Extraction/Yard Disturbances
- Firearms Training/Range Communications
- Border & Port Protection

When set at full volume the **Max-Out™ Portable Acoustic Hailer** is able to project voice (live or recorded) or piercing alert tones at sound pressure levels up to 144dB with remarkable clarity to distances of nearly 1/2 mile (750m) away! **NOTE: Gunshots produce sound pressure levels of approx. 140dB.**

The **Max-Out™ Portable Acoustic Hailer** is equipped with a 3.5mm (1/8") Line Input Jack which allows the device to be connected to and project audio from virtually any external, amplified sound source such as a digital voice recorder containing pre-recorded messages or commands. The Line Input Jack may also be used to allow for the **Max-Out™ Portable Acoustic Hailer** to be operated at a distance from a smart phone running a proprietary app that is available for free download.

MAX-OUT™

PORTABLE ACOUSTIC HAILER

WHY PAY MORE?

Many of the features and specifications of the Max-Out™ Portable Acoustic Hailer meet and/or exceed those of other professional law enforcement military grade acoustic hailing devices, but it is nearly 3X less expensive!
